Kevin Perez

Systems Engineering Student | Junior DevOps Engineer | IT Assistant

Profile

Trainee Professional with strong technical foundations in cloud infrastructure (AWS and Azure), automation (Python/Bash), and multi-level IT support, specializing in DevOps. Hands-on experience with containerization (Docker, Kubernetes), CI/CD (GitHub Actions, Git), and infrastructure as code (Terraform).

Skilled at implementing scalable solutions, optimizing processes through scripting, and collaborating in agile environments. Continuously updating knowledge to master DevOps/SRE best practices, with focus on cloud security, monitoring (Prometheus/Grafana) and high availability.

Experience

NetAllCorrect
Assistant/Technical IT (2024-2025)

- Proactive vulnerability assessment in systems.
- Helpdesk technical support (onsite/remote)
- Hardware maintenance and management
- **Task automation** (Bash/Python scripting)
- **Technical documentation** (protocols, KBs, network diagrams)

TechVentures
Technical IT
2023 -2024

- **IT Infrastructure Management (VMs, Servers, DVR, Firewall, AP)**
- **Multi-level IT Support**
- **ETL process implementation for real-time metrics dashboards in Power BI**

Freelance Tech Devolper (Upwork)
Freelance developer (2022)

- Developed enhancements for existing backends (Python) and frontends (JavaScript), including proactive bug identification and resolution as part of QA efforts.
- Optimized API response times by **30%** for two critical applications, improving scalability and user experience.

Education & Certifications

Systems Engineering
University Politécnico Grancolombiano (2022-present)
- *Professional Focus: Cloud Computing, Infrastructure Security, DevOps Automation*

Microsoft Azure - (AZ-900) Fundamentals

Cisco Networking Academy - (CCNA)

SENA- (Ciberseguridad) Ethical Hacking
